## Creation of a hops cultivation complex

### PROJECT DESCRIPTION

The project implies the creation of a modern, high-tech complex for growing and processing hops. The project's initiator and technology partner is LLC "MBB GROUP". The company provides comprehensive services for the preparation and implementation of the European Hop Propagation, Cultivation, and Processing System in Russia.

#### Project advantages:

- High economic efficiency
- Long-term stability (hops have a 20-year lifespan)
- High potential for import substitution
- Extensive sales market

#### Project parameters:

- Project cost – 2.4 billion rubles
- Number of jobs – 50-100 (depending on the season)

- Implementation period – 8 years

### Economic efficiency of the project (10 years):

- Revenue – 5.2 billion rubles
- Return on sales – 79%
- Payback period – 8 years

### Site requirements:

- Minimal area – 250 ha
- Loamy soil
- Slope of the site – up to 5 degrees
- Shed belt around the plantings

**Available territory for implementation:** Vorotynsky municipal district ([see map](#))
