Creation of friction discs production

PROJECT DESCRIPTION

The project implies the construction of a friction disc manufacturing facility in Arzamas, Nizhny Novgorod Region, using innovative solutions in composition and manufacturing technology. This type of product is widely used in mechanical engineering, medicine and defense industry.

Products: friction discs

Project relevance:

- Projected sustainable growth of the global friction disc market (+4.8% per year)
- High demand in the Russian market, driven by the growth of the vehicle fleet, the constant renewal of commercial and special-purpose vehicles and stricter safety requirements

Project parameters:

- Funding required – 3 billion rubles
- Number of jobs – 100
- Implementation period – 2 years
- Payback period – 8 years

Current stage: business planning

SITE DESCRIPTION

Location: Nizhny Novgorod Region, Arzamas urban district, near Peshelan settlement

Site type: greenfield

Land plot details:

- Cadastral number: 52:41:2101005:26
- Area: 9.8 ha

Infrastructure details:

- Power supply – available
- Water supply – available
- Water disposal – available
- Gas supply – available
